

Lunar DPX MD+

Lunar DPX MD+ is a field-proven, fourth-generation pencil-beam platform with a combination of high performance scanning and advanced clinical utility. The revolutionary enCORE software brings ease-of-use and throughput to office-based densitometry. Patient scanning is quick and automated with Lunar DPX Pro. The standard of care sites - spine and femur - are done in seconds, and at low radiation dose.

Product Features

Windows XP Operating System

- enCORE Software
- AP Spine
- Femur
- Dual Femur
- Forearm
- Total Body
- Body Composition
- DICOM
